

# Complete Chapter Answer Keys

## Notes

The chapter-by-chapter answer key lists every problem in *The PowerScore LSAT Logical Reasoning Bible* in chronological order and identifies the classification and source of the question. “Section 1” indicates that the question appears in the first Logical Reasoning section, and “Section 2” indicates that the question appears in the second Logical Reasoning section. You can use this answer key as a quick reference when you are solving problems. Each problem is explained in more detail in the text of the chapter.

**Questions from the LSATs that were administered in recent years have generally been avoided in order to preserve those tests for use as fresh practice exams.**

## Test-by-Test Question Use Tracker

This section contains a reverse lookup that cross references each question according to the source LSAT. The tests are listed in order of the PrepTest number (if any). The date of administration is also listed to make the process easier. If a test is not listed, then no questions from that exam were used in this book.

Questions listed under each test begin by listing the *Logical Reasoning Bible* chapter the question appears in, the page number, whether the problem appears in the chapter text or problem set, and then the question number.
